

## Introduction

Hamworthy Combustion has run a dedicated fully functional training centre since 1948. Due to training demand and the emphasis of high levels of safety standards 'The Hamworthy Combustion Institute' was constructed with the official opening in September 2008.

## The location

The Hamworthy Combustion Institute is situated at our headquarters in Poole, Dorset, 8 miles away from Sandbanks and the blue flag beaches.

We have first class road and rail links to all parts of the UK and are only 90 minutes from Heathrow airport; Heathrow provides convenient access from any country worldwide.

## Courses

We offer customers bespoke technical training to suit all customers' requirements, on the full range of Hamworthy Combustion Burner systems.

## Sectors

Hamworthy Combustion  
Operate in five business sectors:  
Marine  
Power  
Industrial  
Process  
Incineration and Flares

## Facilities

3 Fully functional, purpose built modern air conditioned training suites seating up to a capacity of 60 people. Dedicated Technical Training Workshop with built in classroom. Fully operational Lounge area for break outs, Lunch and refreshments.

## Accreditation

Hamworthy Combustion have achieved DNV accreditation for our Marine Gas Combustor Unit Training course (GCU). We also provide direct "hands on" experience with "working" access to our full scale 100MW GCU on site here in Poole, Dorset

## Training

All of our courses can be adapted to suit all levels of staff and can be delivered at either the Hamworthy Combustion Institute or at your premises, worldwide. Safety and maintenance are covered in all of our courses as standard.

We also offer a range of set training days, these cover Combustion Theory, Gas Awareness, Industrial Burner overview, Control systems, Energy saving applications to advance level, burner Construction, operation and setting.

## Classes

All of our courses are fully interactive, with classroom sessions and the further use of our dedicated training workshop or test rig facilities.

Daily we use questions and answer sessions with the training topic objective, to ensure delegates are fully conversant. Each and every course is completed with a course assessment; these results are fed back to the customer with evaluation forms and course certification.

## Workshop

We have developed a fully functional technical training workshop. Comprising of control systems, gas trains, a full range of Hamworthy burners, across the sectors, gas safety awareness tools amongst many other training aids.

## Trainers

All of our trainers are specialist within the business, they are extremely knowledgeable with their business sectors and all hold the necessary teaching qualifications.

We ensure that all trainers are fully involved in the day to day business, so that they are always one step ahead in their dedicated fields.
