

## Total Spares Burner & Boiler Solutions, UK

At Hamworthy Combustion our spare part service aims to provide customers with the right spare part in the right place at the right time. Through our Package Spares we are able to offer a **Total Supply Solution** for all combustion related products plus many of the day to day requirements of the world's marine and industrial markets.

Offering a total combustion spare supply for the whole boiler house we can meet your requirements for boiler, burner, control and ancillary products. As we as supporting our own burners we offer spares for other burners and a comprehensive boiler spares range. Competitive pricing may well offer you

significant cost savings

From our Poole UK headquarters we are able to ensure prompt despatch of customer orders to any part of the world. Where parts are not stocked, we have industry trained Engineers and Technicians who are able to identify, source and offer competitive prices for most industry standard products.

The modern boiler installation tends to be sophisticated and self-regulating. Despite this boiler room maintenance should be an ongoing daily routine. For reliable and efficient operation inspection and maintenance are critical. A poorly maintained and inefficient plant could cost you over 10% of your fuel bills.

In partnership with our UK Package Service team we are able to bring to you a supply package to suit your individual needs. Offering total customer support from sourcing, right through supply, installation and a 100% commitment to supporting our customers we believe we can give you a true "one stop" combustion support package.

Genuine spare parts ensure that your plant is maintained with quality components that are fit for purpose and give economic and reliable performance. Many burner / boiler failures and unscheduled shut downs are caused by poor maintenance and operation.

The use of non-original parts comes with additional risk and cost implications. Non original parts can be cheaper but can you be sure of what that low cost part is actually costing your company.

Maintaining a stock of spares can limit the disruption caused by failures. Equipment breakdowns can be rectified in hours rather than days allowing you to get on with your business.

Whether the motivation of the maintenance program is for safety, cost, reliable operation or all of these reasons, it is the best means of preventing boiler related problems.

Hamworthy Combustion is leading specialists in all aspects of boiler room operation, maintenance and supply. We able to offer a spares supply package to suit your needs. We offer total customer support from source to supply. Overleaf are details of the ways that ***we can help you to stop burning money.***
